

# WATER BUFFALO TREATS

Water buffalo, or bufala, are a completely different species than buffalo, which are actually bison. Water buffalo meat is very lean, containing less than half the fat of beef and 40-60% less cholesterol. It is a rich source of protein, B-group vitamins, vitamin D, niacin, phosphorus and the essential minerals iron and zinc with all of the proven health benefits. As with all grass fed animals, the meat is also a good source of omega-3-fatty acids.

## Water Buffalo Facts
